20 Minute Walk-Jog Interval Workout: A classic training principle for building aerobic stamina. Alternate brisk walking with jogging in intervals determined by your area: walk a street block, jog a street block and repeat for 20 minutes. If you live on a long street alternate walk interval with a jog interval at each lamppost. Challenge yourself by doubling up the jogging (2 blocks or lampposts at one time).

20 to 60 Minute Trail Walking or Hiking: #embracewinter by adventuring off road to explore local trails. To access trail maps in your area at <https://apps.apple.com/ca/app/alltrails-hike-bike-run/id405075943>

06 February 6: Saturday Sweat

1. **Squat Jumps** (Option: Jump side-side to mimic downhill skiing)
2. **Alternate forward or backward stepping lunges** (Option: Plyometric lunges to mimic cross-country skiing)
3. **Quick Step side-to-side** (Option: Skater to mimic skating)
4. **Burpee Jumps** (Option: modified without jumping up or out into a plank; step one foot back at a time into a plank to mimic falling down and getting back up)
5. **Mountain Climbers from the ground/plank position** (Option: perform on a incline: seat of a bench or step to mimic climbing up a hill pulling a toboggan)

07 February 7: StepUp Sunday

Step Ups: using a step or curb step "up (right), up (left), down (right), down (left)" 10-25 times on each leg and repeat 5 times for a total of 100 to 500 step ups. Swing your arms to lift intensity. For a greater challenge find a set of stairs to climb up and run down 5-10 times.
